Yes - in some cases filtered results are higher than unfiltered???

RO - is a separate - low flow tap adjacent to kitchen tap. This is typical. Difficult to treat the higher flow.

Ellinger - are we sure the samples are in the right order (filtered, unfiltered)?

Myrick - where is the RO unit? Looks like tap is higher.

Subject: UPDATED w/ Wellhead and TAP info - Week #2 - Summary of Locations Exceeding Trigger Levels

Dennis -

Attached is the updated summary of Week #2 location exceeding triggers. Now includes info on where the sample was collected (wellhead, tap, RO, etc.)

Previous table only noted the maximum detects and did not indicate where the sample was collected.

Will be sending up the Week #3 late today.

- Kelley

Subject: Week #2 - Summary of Locations Exceeding Trigger Levels

Dennis -

Sounds like we still have some issues to work out. I'm at the site and will be on the 1 pm call (I am assuming its the - 5996 #).

In the meantime.... here's a summary of the locations exceeding triggers for week sampling. Please note that where possible - I tried to include additional information regarding water provision (EPA or Cabot), any treatment and/or methane venting.

Talk to you later - Kelley
